Полноцветные лазерные системы **TechArt**

Лазерные проекторы TechArt хорошо себя зарекомендовали в абсолютно любых условиях.

Использование модулей "Jenlas" Jenoptik (Германия) и "Coherent" (США), а также сканирующих систем "Cambridge Technology" (США), обеспечивает долгую бесперебойную работу лазера и огромную наработку на отказ. Компактность, практичность и неприхотливость лазерных проекторов обеспечивает удобство их эксплуатации.

Сценическое оборудование от TechArt — это, пожалуй, идеальное соотношение цена/качество, что сделало их востребованным на лазерном рынке в России, на Украине, а также в Европе.

Оборудование TechArt представлено двумя основными модификациями: Max и Spectr. Оснащённые сканирующими системами Cambridge technology CT 6215 turbo, которые легко справляются со сложными изображениями, лазеры TechArt – это гарантированно высокое качество воспроизведения лазерной графики.

Лазерные проекторы TechArt – это:

- Широкие возможности;
- Компактность;
- Простота подключения и управления;
- Доступная цена.

DREAM LASER

Professional indoor and outdoor air cooled full color laser system in new compact design, input power 230V/2A, analog RGB modulation, full color scale.

Excellent color balance. Completed in aluminium housing.
