

**dreamlaser**

dreamlaser is a world leader in the application of innovative multimedia technology. We have been developing and implementing creative, high-tech solutions since 2005. Today we cover the full production cycle, from concept development, laser scanning, and technical production to content production and full technical implementation using our own equipment.

SHOWREEL

- programming and setup of disguise (d3) media servers. Russia's only company with disguise studio status
- our own logistics centre

SELECTED  
PROJECTS

ADIDAS.FIFA

The objective of the installation was to communicate the idea that only a creative approach can unite people around something important, help to solve the hardest problems, and, of course, inspire FIFA World Cup viewers to support our team
